## DISTANCES BETWEEN PRINCIPAL PORTS OF THE WORLD.

The chief ports of the world are named in alphabetical order across the top and down the sides of the tables. The distance between any two ports will be found at the intersection of the two columns which contain the names of the selected ports. Thus the distance from Baltimore to Bombay is given as 8,431, and the small "S" shows that the route is via Suez Canal. Distances are for full-powered steam vessels reckoned in nautical miles.

	Amsterdam	Antwerp	Barbados	Bellast	Bombay	Boston	Bremen	Buenos Aires	Cape Town	Cherbourg	Genoa	Glasgow	Hamburg	Havana	Haïre	Hongkong	Liverpool	London	Melbourne	New Orleans	New York	Plymouth	Rio de Janeiro	San Francisco	Shanghai	Singapore	Southampton	Valparaiso	Yokohama

## DISTANCES BETWEEN PRINCIPAL PORTS OF THE WORLD—Continued.

The chief ports of the world are named in alphabetical order across the top and down the sides of the tables. The distance between any two ports is found at intersection of the two columns which contain the names of the selected ports. Thus the distance from New York to Melbourne is given as 11,586, and the small "C" shows that the route is via Cape of Good Hope. Distances are for full-powered steam vessels reckoned in nautical miles.

## ITALY

The Kingdom of Italy is divided into 89 Provinces, of which boundaries are shown and capitals of same are designated. Thus, a name of Province is in all cases the same as capital towns. The larger divisions, known as Compartimenti, are not now recognized as legal divisions.

# INDEX-GAZETTEER

## OF THE

### PRINCIPAL TOWNS OF THE WORLD

The following Index-Gazetteer includes the names of all places in the United States having a population of 500 and over, and of all cities in foreign countries having 10,000 or more inhabitants, with the exception of certain Asiatic cities omitted because reports respecting them are untrustworthy. Following the name of the place are the name of the county, country or other political division in which the place is situated, and the index-reference letter and number by means of which the location of the place is found on the map; the page of the Atlas where any desired map is printed may be found by referring to the prefatory Alphabetical List of Countries, States and Cities. Then follow data showing commercial, industrial, educational and general characteristics of the place and the immediately surrounding country. At the end of the line is given the population of the city or village. Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list, and their situation on the map, in each case, may readily be determined by means of the index-reference letters and numbers.

In the United States the county seats are designated by c.h., following the name of the place. The capital cities of various states and countries are named.

In cities of the United States having 20,000 inhabitants or over, the three largest manufacturing industries, as reported by the Census for the year 1900, are specified in the order of their importance, determined by the total value of these products. In some instances, where the value of the products of these specified manufacturing industries is notably large, the total for the census year is given in parentheses, following the name of the industry. In foreign cities the leading industries are designated in accordance with the best authorities.

The population of each place in the United States is in accordance with the census of 1900; for places in other countries the latest official census or authentic estimate has been used. The date of the latest official enumeration of the following countries is given as indicating the respective value of the figures used in the compilation: Algeria, 1901; Australia, 1901; Austria, 1900; Belgium, 1901; Bulgaria, 1900; Canada, 1901; Chile, 1902; Costa Rica, 1902; Cuba, 1899; Denmark, 1900; Egypt, 1897; England and Wales, 1901; Gold Coast, 1901; Greece, 1896; Guatemala, 1898; Guiana, British, 1903; Guiana, French, 1895; India, 1901; Ireland, 1901; Italy, 1901; Japan, 1898; Java, 1900; Mexico, 1900; Netherlands, 1899; Norway, 1900; Paraguay, 1899; Philippine Islands, 1903; Porto Rico, 1899; Portugal, 1900; Russia, 1897; Roumania, 1899; Salvador, 1901; Scotland, 1901; Spain, 1900; Sweden, 1902; Switzerland, 1900.

<sup>a</sup> The law of February, 11, 1835, introduced the gold standard, with an ideal gold peso weighing 0.539 gram as the monetary unit.

<sup>b</sup> The "British dollar" has the same legal value as the Mexican dollar in Hongkong and Labuan.

<sup>c</sup> Value of the rupee to be determined by consular certificate.

<sup>d</sup> The sovereign is the standard coin of India, but the rupee is the money of account, current at 15 to the sovereign.

<sup>e</sup> On and after May 1, 1905, the silver dollar will be valued at \$0.498.

<sup>f</sup> By Imperial Ukase January 3-15, 1897, 14 paper rubles=1 gold ruble.

NOTE.—The coins of silver standard countries are valued by their pure silver contents at the average market price of silver for the three months preceding the date of this circular.
